

## Digital & Analog Audio Delayer

DLA180 one is for analog audio and digital audio delay processing of professional products. Delay time can be 0-180 seconds or 0-9999 milliseconds, and with external synchronization correction.

Which uses digital signal processing chip as the core operations, the indicators in line with international standards; has multiple emergency function keys for different unexpected situations can be addressed urgently. Can be used in radio and television broadcasting, live, production and other occasions. The product is fully functional, stable and reliable performance, upgrade and maintenance convenient.

- Delay time from 0~180 seconds, or 0~ 9999 milliseconds adjustment.
- Digital & Analog audio outputs simultaneously transform.
- Digital audio processing complies AES3-1992 standard.
- Delay creation / removal to support Silent mode, Playback mode, Backup broadcast mode.
- Multiple protection modes, including: emergency release delay time, Reading typo correction, cough protection, mute, key bypass.
- Support the internal clock and the external reference clock synchronization.
- With power-down memory function.
- Double switch and double power supply redundancy design, support power off bypass.

### Analog Audio Index

Sampling Rate	32K~192K
Audio input level	+24dBu
Dynamic Range	>110dB
Signal to noise ratio	>85dBu (A weighted)
THD+N	<0.005% @1KHz, -3dBFS
Frequency Response	20Hz to 20kHz, $\pm 1$ dB at 48K sampling
Input impedance	>10K $\Omega$ XLR (Balanced)

### Digital Audio Index

Follow the standard	AES3-1992
Sampling Rate	32K~192K
Dynamic Range	>128dB
Audio processing	24-bit
AES output	110 $\Omega$ XLR (Balanced)

Front Panel Description

① Power & Power Light	
② LCD	Displaying information.
③ Digital Tube	Shows the delay time or the menu number.
④ Function setup Button	
UP	Add or step to the next command line.
SETUP	Enter the setup menu or OK.
DOWN	Subtract or step to the previous command line.
⑤ Special Function Button	
START	Start delay.
EXIT	Exit delay.
DUMP	Emergency release.
2S	Depending on the setting for 2 to 8 seconds reading typo protection.
COUGH	Cough protection.
MUTE	Muted.
BYPASS	Bypass button.

Ordering information

DLA180-A Series	Support analog audio, second precision adjustment.
DLA180-AD Series	Support Digital & analog audio, second precision adjustment.
Note: the above series products are all have a delay of 60 seconds, 120 seconds, 180 seconds.	
DLA180-AM	Support analog audio, millisecond precision adjustment.
DLA180-ADM	Support Digital & analog audio, millisecond precision Adjustment.

Back Panel Description

① Power Supply Interface	
② Analog Audio Interface (XLR)	
L IN	Analog audio input (left channel)
R IN	Analog audio input (right channel)
L OUT	Analog audio output (left channel)
R OUT	Analog audio output (right channel)
③ Digital Audio Interface (AES)	
IN	Digital audio input
OUT	Digital audio output
SYNC IN	External synchronization clock input interface.
④ Storage Device Input Interface (options)	
USB	USB input (Backup).
SD CARD	SD card input (Backup).
⑤ Network interface (options)	
LAN 1	LAN input (Backup).
LAN 2	Network interface (Remote control)
⑥ Remote control interface (options)	
RS232	Serial ports input(Backup).
CONSOLE	Serial ports interface(Remote control).

Physical Features & Environmental Req.

AC Input	220V/50Hz
Power Consumption	10W
Operating Temperature	0-40°C (32-104°F)
Moisture	5-95% (non condensing)
Dimension (W×H×D)	427mm×44mm×330mm
Weight	6 Kg
